

HortiPower Flowering Bulb HP-FB-5W

HortiPower Floriculture Bulb helps to advance or delay flowering while reducing energy consumption by 50% compared to CFL based solutions. HortiPower Floriculture is ideal for greenhouses with Chrysanthemum, Dragon Fruit and others.

The lighting properties such as spectrum and intensity are optimised for the flowering time and maximise yield at optimum season or plant height.

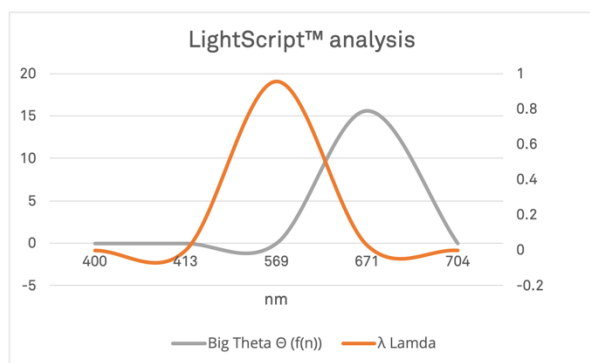

It is easy to install and features an E27 base.

PRODUCT FEATURES

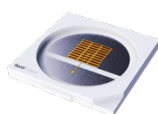

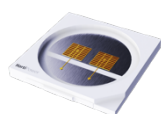

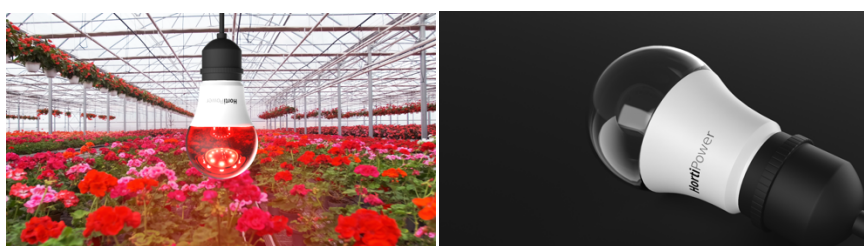

SPECIFICATION

Voltage input	AC 100-264V
Power consumption	5W
Light output	10 µmol
Ingress Protection	IP20
Lifetime with 90% flux maintenance	25.000 hours
Fitting	E27
